

Business Maintenance Solutions

North East Computer Systems Ltd. provides tailored maintenance solutions for small to medium sized companies.

Our engineers are Microsoft and Cisco certified and have many years experience.

What we believe:

- Preventative maintenance offers businesses a more robust, reliable and secure network environment
- Onsite visits throughout the year ensure the integrity of your network to an optimal level
- This way of providing maintenance cover differs from most other types of service offered by other providers who often charge substantial sums for callouts

What you get:

- North East Computer Systems Ltd. believes in giving the client something back for their investment. Our intention is not only to provide maintenance of PC`s and networks but we offer complete IT support for all users just as if you had your own IT department
- Additionally we provide support for software applications including installations and upgrades

What are the benefits?

- Emergency callout cover
- Continuous network integrity
- Secure user environment
- Hardware cover
- Remote support
- Software support
- Telephone support

- Preventative maintenance
- Free advice
- Taylor made solutions

NECS Maintenance starts from just £500 per year. For more information and FREE advice please contact us.
